

الامتحان الوطني الموحد للبكالوريا
امتحان تجريبي
Basic English
NS 12

العدد	اللغة الإنجليزية	مدة الإجازة
2	كل أسبوعين أسبوعياً والتقنية والأصيلة	المعلم

(1) Moncef Slaoui was born on July 22, 1959 in Agadir, Morocco. His father worked in the irrigation business. Years after, he died when Moncef was a teenager. The mother was left alone to raise him and his four siblings.

(2) Slaoui graduated from Mohammed VI High School in Casablanca. In 1976, Slaoui left Morocco at the age of 17 to study medicine in France but missed the registration deadline due to new registration procedures and his mother being ill. He enrolled at the Free University of Brussels where he received a BS in biology and then a MS. During this time he was very politically active. In 1983, Slaoui received a PhD in molecular biology and immunology from the Free University of Brussels.

(3) Slaoui took postgraduate courses at Harvard Medical School and the Tufts University School of Medicine, although he did not complete his studies at either school due to work commitments. In 1998, he received an accelerated MBA from the International Institute for Management Development (IIMD) in Lugano, Switzerland.

(4) In 1988, after consulting SmithKline-RIT for three years, Slaoui joined the company as a vaccine researcher. In 2006, he was appointed head of research and development at GlaxoSmithKline. Slaoui spent thirty years working at GSK. During his time there, Slaoui oversaw the development of numerous vaccines, including Cervarix to prevent cervical cancer, Rotarix to prevent gastroenteritis in children, and an Ebola vaccine. He also spent 27 years researching on a malaria vaccine, Mosquirix, that was approved by the European Medicines Agency in 2015 and touted as the first in the world. In 2016, he discussed GSK's development of bioelectronic medicine. Slaoui left GSK on June 30, 2017. In September 2017, he joined European venture capital firm Medicxi.

(5) On May 15, 2020, President Donald Trump officially announced Operation Warp Speed, a project to develop and deliver 300 million doses of a vaccine for the coronavirus disease 2019 by January 2021. Operation Warp Speed was managed by White House senior adviser Jared Kushner with the support of the United States Department of Defense and the United States Department of Health and Human Services.

(6) President Trump described Slaoui as "one of the most respected men in the world in the production and, really, on the formulation of vaccines", while Secretary of Health and Human Services Alex Azar praised him as "arguably the world's most experienced and successful vaccine developer".

III. WRITING (10 POINTS)

Task one (4pts)

To be a successful person in the future, one should follow certain principles. For me these principle are goal setting, and time managment. First, a person should have a clear goal in mind. This will help him or her to know which decision to make and why. second, time management plays an important role in making a person successful. By organizing our time, we can do many tasks and take advantage of every moment during the day. Finally, we infer from the information above that goal setting and time management are necessary to make a person successful

Task two (6pts)

FREE FIRE and PUBG are causing a lot of harm to students and even children. Most of them are seriously addicted. Teachers and parents consider these games as enemies.

Write a letter to the editor to suggest ways that can help children and youngsters to avoid being addicted to computer or phone games. Give reasons and examples to support your point of view.

Dear Editor,

I am writing this letter to you to sensitize the readers of our school magazine to the effect of such video games as PUBG and FreeFire. Firstly, many children are addicted to these video game and they take much of their time. For example, many students would ignore their lessons and spend much of their time playing. Secondly, these video games are violent and for children, this is harmful. For instance, violent games would affect their psychology and make them violent in school or at home. To conclude, I believe that children should stay away from these games as they take much of their time and affect their mental health.

DO NOT WRITE YOUR NAME OR SIGN THE LETTER.
